6. SwiftUI Examples

This repo aims to provide sample code for lots of different chart types for you to use as inspiration for your own projects. We start by recreating the sample charts Apple uses in their sessions related to Swift Charts. The goal is to make each chart type customizable, accessible and flexible so that you can easily change it to your needs.

13. SwiftUI-Combine-and-Data-Course-based

SwiftUI Combine and Data and want to share what I learned 🙌 I learned how:

- to create trackable scroll view by using ScrollView, GeometryReader and PreferenceKey 🔧
- to use Link to open a web page in Safari 🔗
- to load and decode data from a JSON file 📁
- to create view extensions 🎨
- to install Firebase and Firestore 📁
- to fetch data from Firestore 📚
- to setup Firebase Cloud Message and Apple Push Notification service 📨
- to configure Notifications in AppDelegate 📩
- to observe the ScenePhase change ➡️📱
- to make my application more performant with a lite mode option and

verify the user's network connection
